

Assignment – Modularization Techniques in SAP ABAP

Objective

Create an SAP ABAP report using all major Modularization Techniques without using OOPS concepts.

Concepts Mandatory

- Function Modules
 - Subroutines
 - INCLUDE Programs
 - Macros
 - PARAMETERS
 - Internal Tables
 - IF ELSE
 - CASE Statements
-

Scenario

Business wants a simple Employee Management Report.

- Accept employee details
 - Calculate salary bonus
 - Display employee information
 - Reuse logic using modularization techniques
-

Selection Screen

PARAMETERS:
P_EMPID TYPE I
P_NAME TYPE CHAR20
P_SAL TYPE P DECIMALS 2

INCLUDE Programs

- ZTOP – Global Declarations
 - ZSEL – Selection Screen
 - ZF01 – Subroutines
 - ZMAC – Macros
-

Subroutines

- CALCULATE_BONUS
 - DISPLAY_DATA
 - CHECK_GRADE
-

Bonus Logic

If Salary > 50000 → Bonus = 20%
Else → Bonus = 10%

Function Module

Create custom Function Module:

ZFM_EMPLOYEE_DETAILS

Pass Employee ID, Name, Salary
Return Bonus Amount

Macro Requirement

DEFINE M_WRITE.
WRITE: / &1, &2.
END-OF-DEFINITION.

CASE Requirement

A → Excellent
B → Good
C → Average

Output Format

Emp ID | Name | Salary | Bonus | Grade

Deliverables

- Main Program
 - Include Programs
 - Function Module
 - Output Screenshot
 - Logic Explanation
-

Interview Questions

1. What is modularization?
 2. Difference between Function Module and Subroutine?
 3. Why use INCLUDE programs?
 4. Advantages of Macros?
 5. When to use Function Modules?
-
